

Epionce Essential Recovery Kit

Post-Procedure Care for Optimal Benefits

Get Clinically Proven Post-Procedure Results

Proper post-care immediately following moderate to deeper skin rejuvenation procedures — including chemical peels, micro-needling and ablative and non-ablative laser procedures — will yield optimal aesthetic results post-procedure. The Epionce Essential Recovery Kit is a convenient take-home regimen that quickly boosts hydration and helps soothe and calm highly sensitized skin.

Key Benefits: Hydrates + Soothes + Calms

- **All-in-one take home kit optimizes the skin post-procedure and helps repair the barrier**

Includes Milky Lotion Cleanser, Priming Oil, Renewal Calming Cream and Enriched Firming Mask

Milky Lotion Cleanser

Gently cleanses compromised and sensitive skin without overdrying or irritation

Priming Oil

Primes and preps skin for extra hydration; helps reduce stinging

Renewal Calming Cream

Calms, soothes and hydrates very dry, sensitized skin; helps restore skin barrier function

Enriched Firming Mask

Hydrates and helps visibly calm redness post-procedure

- **Directions for Use** (Suggested regimen only. Follow all instructions as directed by your physician or skin care professional.)

Day 1 (First 24 hours)

Apply 2-4 pumps of Priming Oil followed by a generous application of Enriched Firming Mask as needed to keep skin hydrated.

Days 2-3

Cleanse face with Milky Lotion Cleanser. Apply 2-4 pumps of Priming Oil followed by a generous application of Renewal Calming Cream as needed to keep skin hydrated. For additional hydration, apply Enriched Firming Mask over Renewal Calming Cream.

Day 4

Cleanse face with Milky Lotion Cleanser. Apply Renewal Calming Cream as needed. May continue to layer Priming Oil and/or Enriched Firming Mask as needed. Apply SPF 50 before any sun exposure.
